

# Year 1 Science

# Plants

I can name a variety of common wild plants.

**Grammarsaurus**

# Observing Time

Now it is time to check on your growing plants.

**Has your plant grown above the soil yet?**

**How has it changed since last time you looked?**

Draw a picture of your plant on the plant diary activity sheet.

Hi again! You are teaching me a lot about plants and I can't wait to go back to Planet Glog and tell them all about what I have learnt!

I've heard that you eat plants. What plants do you eat? Can you eat all of the plants on your planet? Can you eat the whole plant?

# Thinking Time...

What plants do we eat?

Can we eat every plant?

# Eating Plants.

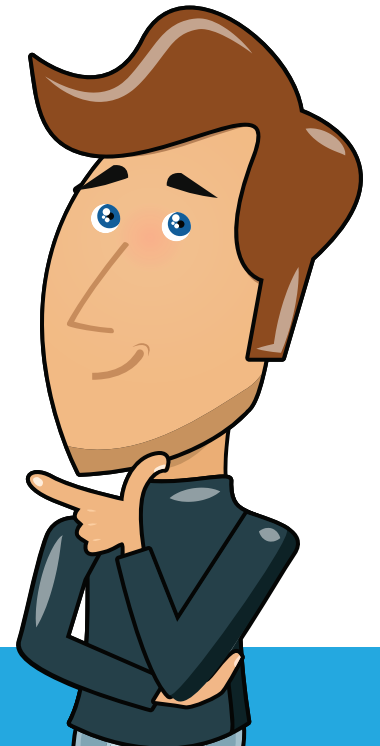

The plants that we eat are called fruits and vegetables.

**What is your favourite plant to eat?**

# Thinking Time...

How do fruits and vegetables grow?

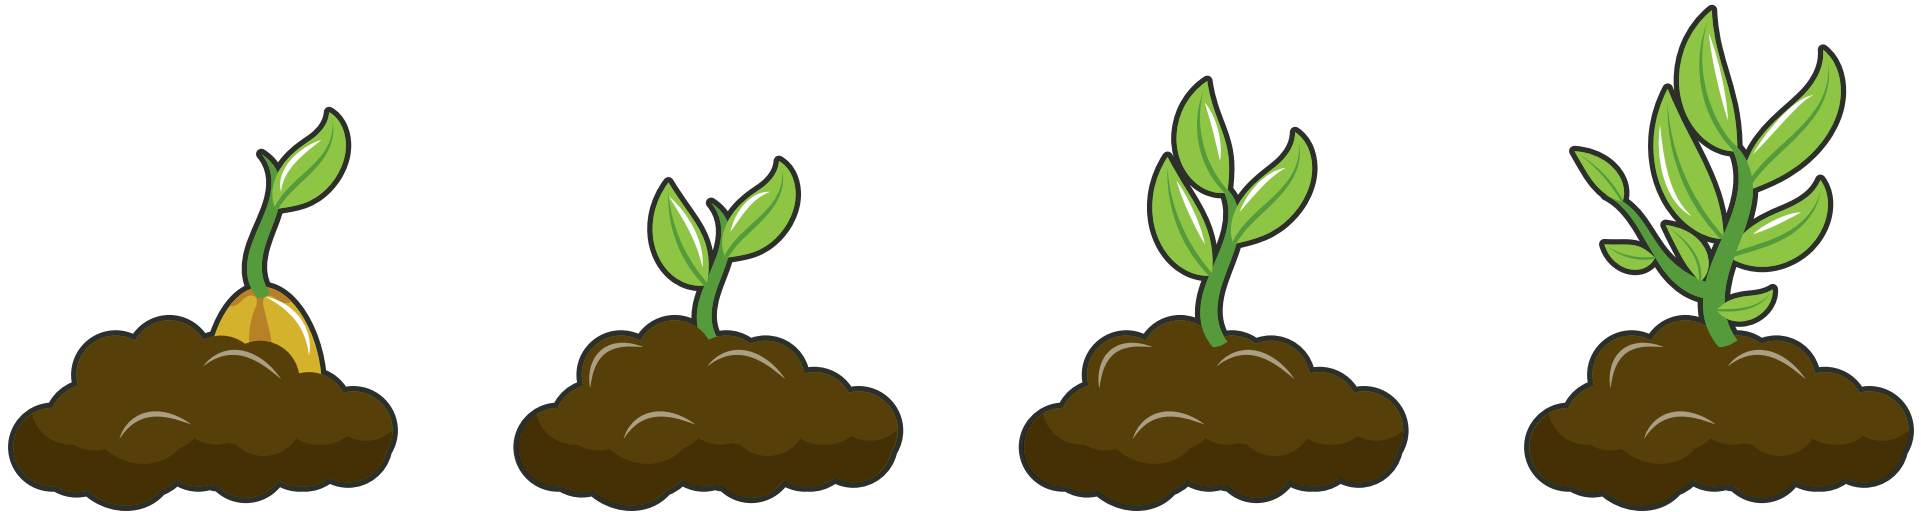

# Fruit or Vegetable.

Fruits and vegetables grow in the same way as other plants.

They start off as a seed. They need water and sunlight to grow.

When they grow, part of the plant grows into a fruit or vegetable.

# Fruits and Vegetables

**Fruits and vegetables grow in different ways.**

Most fruits grow on trees, bushes or plants.

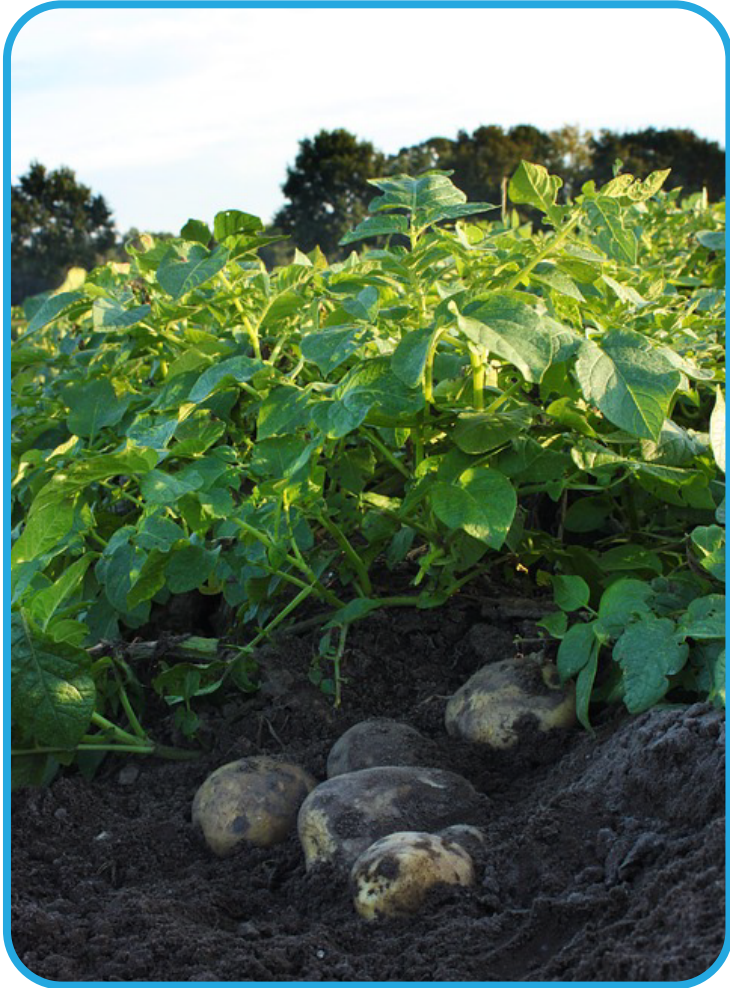

Some vegetables also grow on plants but some grow under the ground.

**No vegetables grow on trees. No fruits grow under the ground.**

# Potatoes

Potatoes grow under the ground.  
Potatoes are known as a **root vegetable**.

# Apples

Apples grow on trees. They usually grow in an **orchard**. An orchard is a group of fruit trees.

Apples are a **fruit**.

# Carrots

Carrots grow under the ground.  
Carrots are **root vegetables**  
like potatoes.

# Brussel Sprouts

Brussels sprouts are a type of cabbage. They grow on the stalk of the plant. They are very good at growing in the cold.

Brussel Sprouts are a **vegetable**.

# Bananas

Bananas grow in bunches on trees. Bananas need very hot weather to grow.

They are a **fruit**.

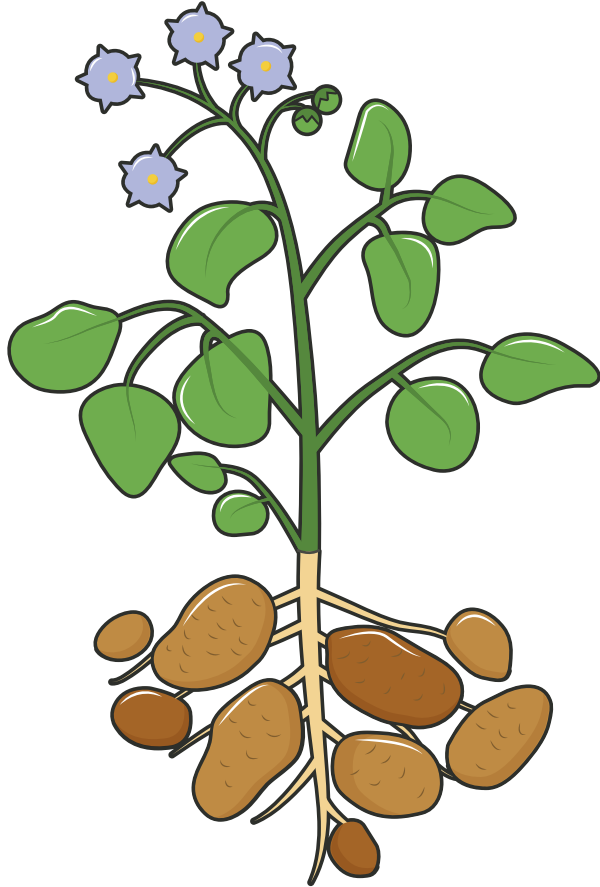

# Strawberries

Strawberries grow from plants which spread across the ground. Strawberries only turn red when they are ripe. This means they are ready to eat.

Strawberries are a **fruit**.

# Can you name the parts of the plant?

Flower

Stem

Leaf

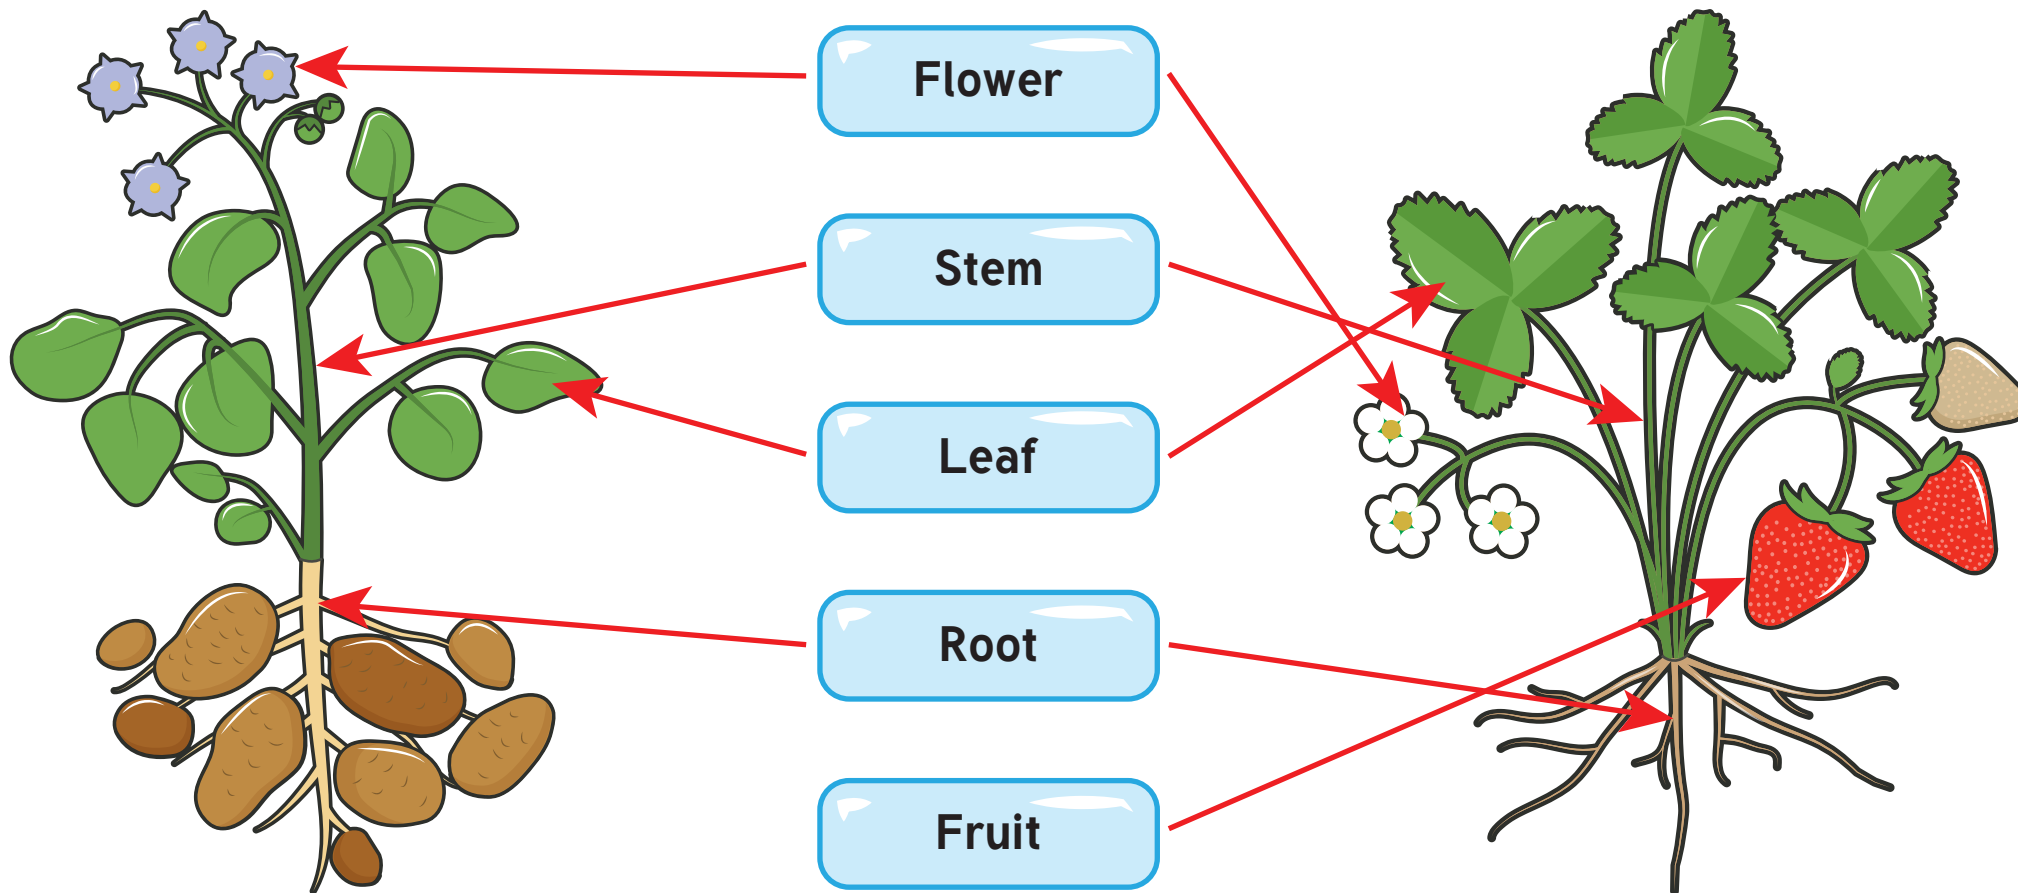

Root

Fruit

# Can you name the parts of the plant?

Did you match up the names correctly?

# Independent Activity

I have a lot of plants in my spaceship ready to take back to the Planet Glog! Please can you fill your sheets in to tell me which plants I can eat and which I can't?

# Odd one out.

Which one is the odd one out? Why?
