

# Identifying Plants

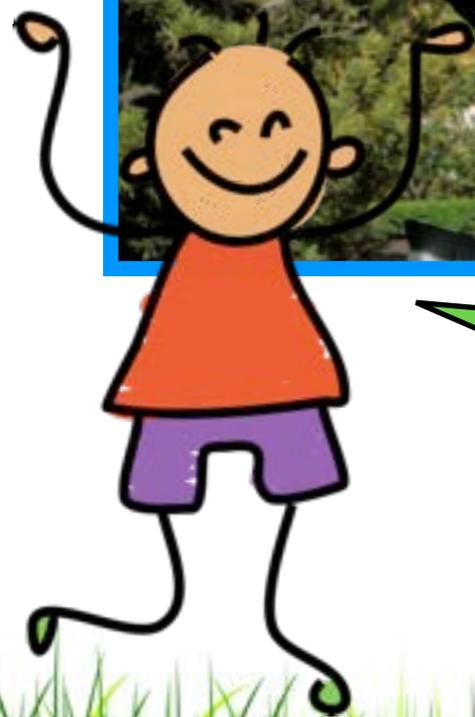

**Today we will be...**

Identifying and describing  
garden plants.

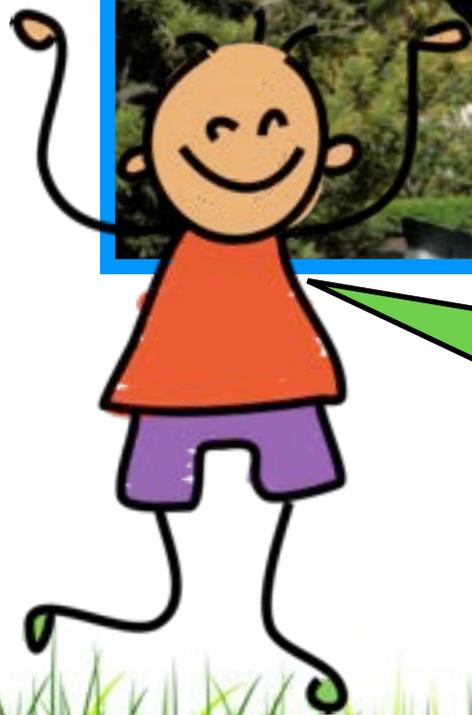

# What is a plant?

Think, pair, share your ideas.

Where do you think these plants are growing?

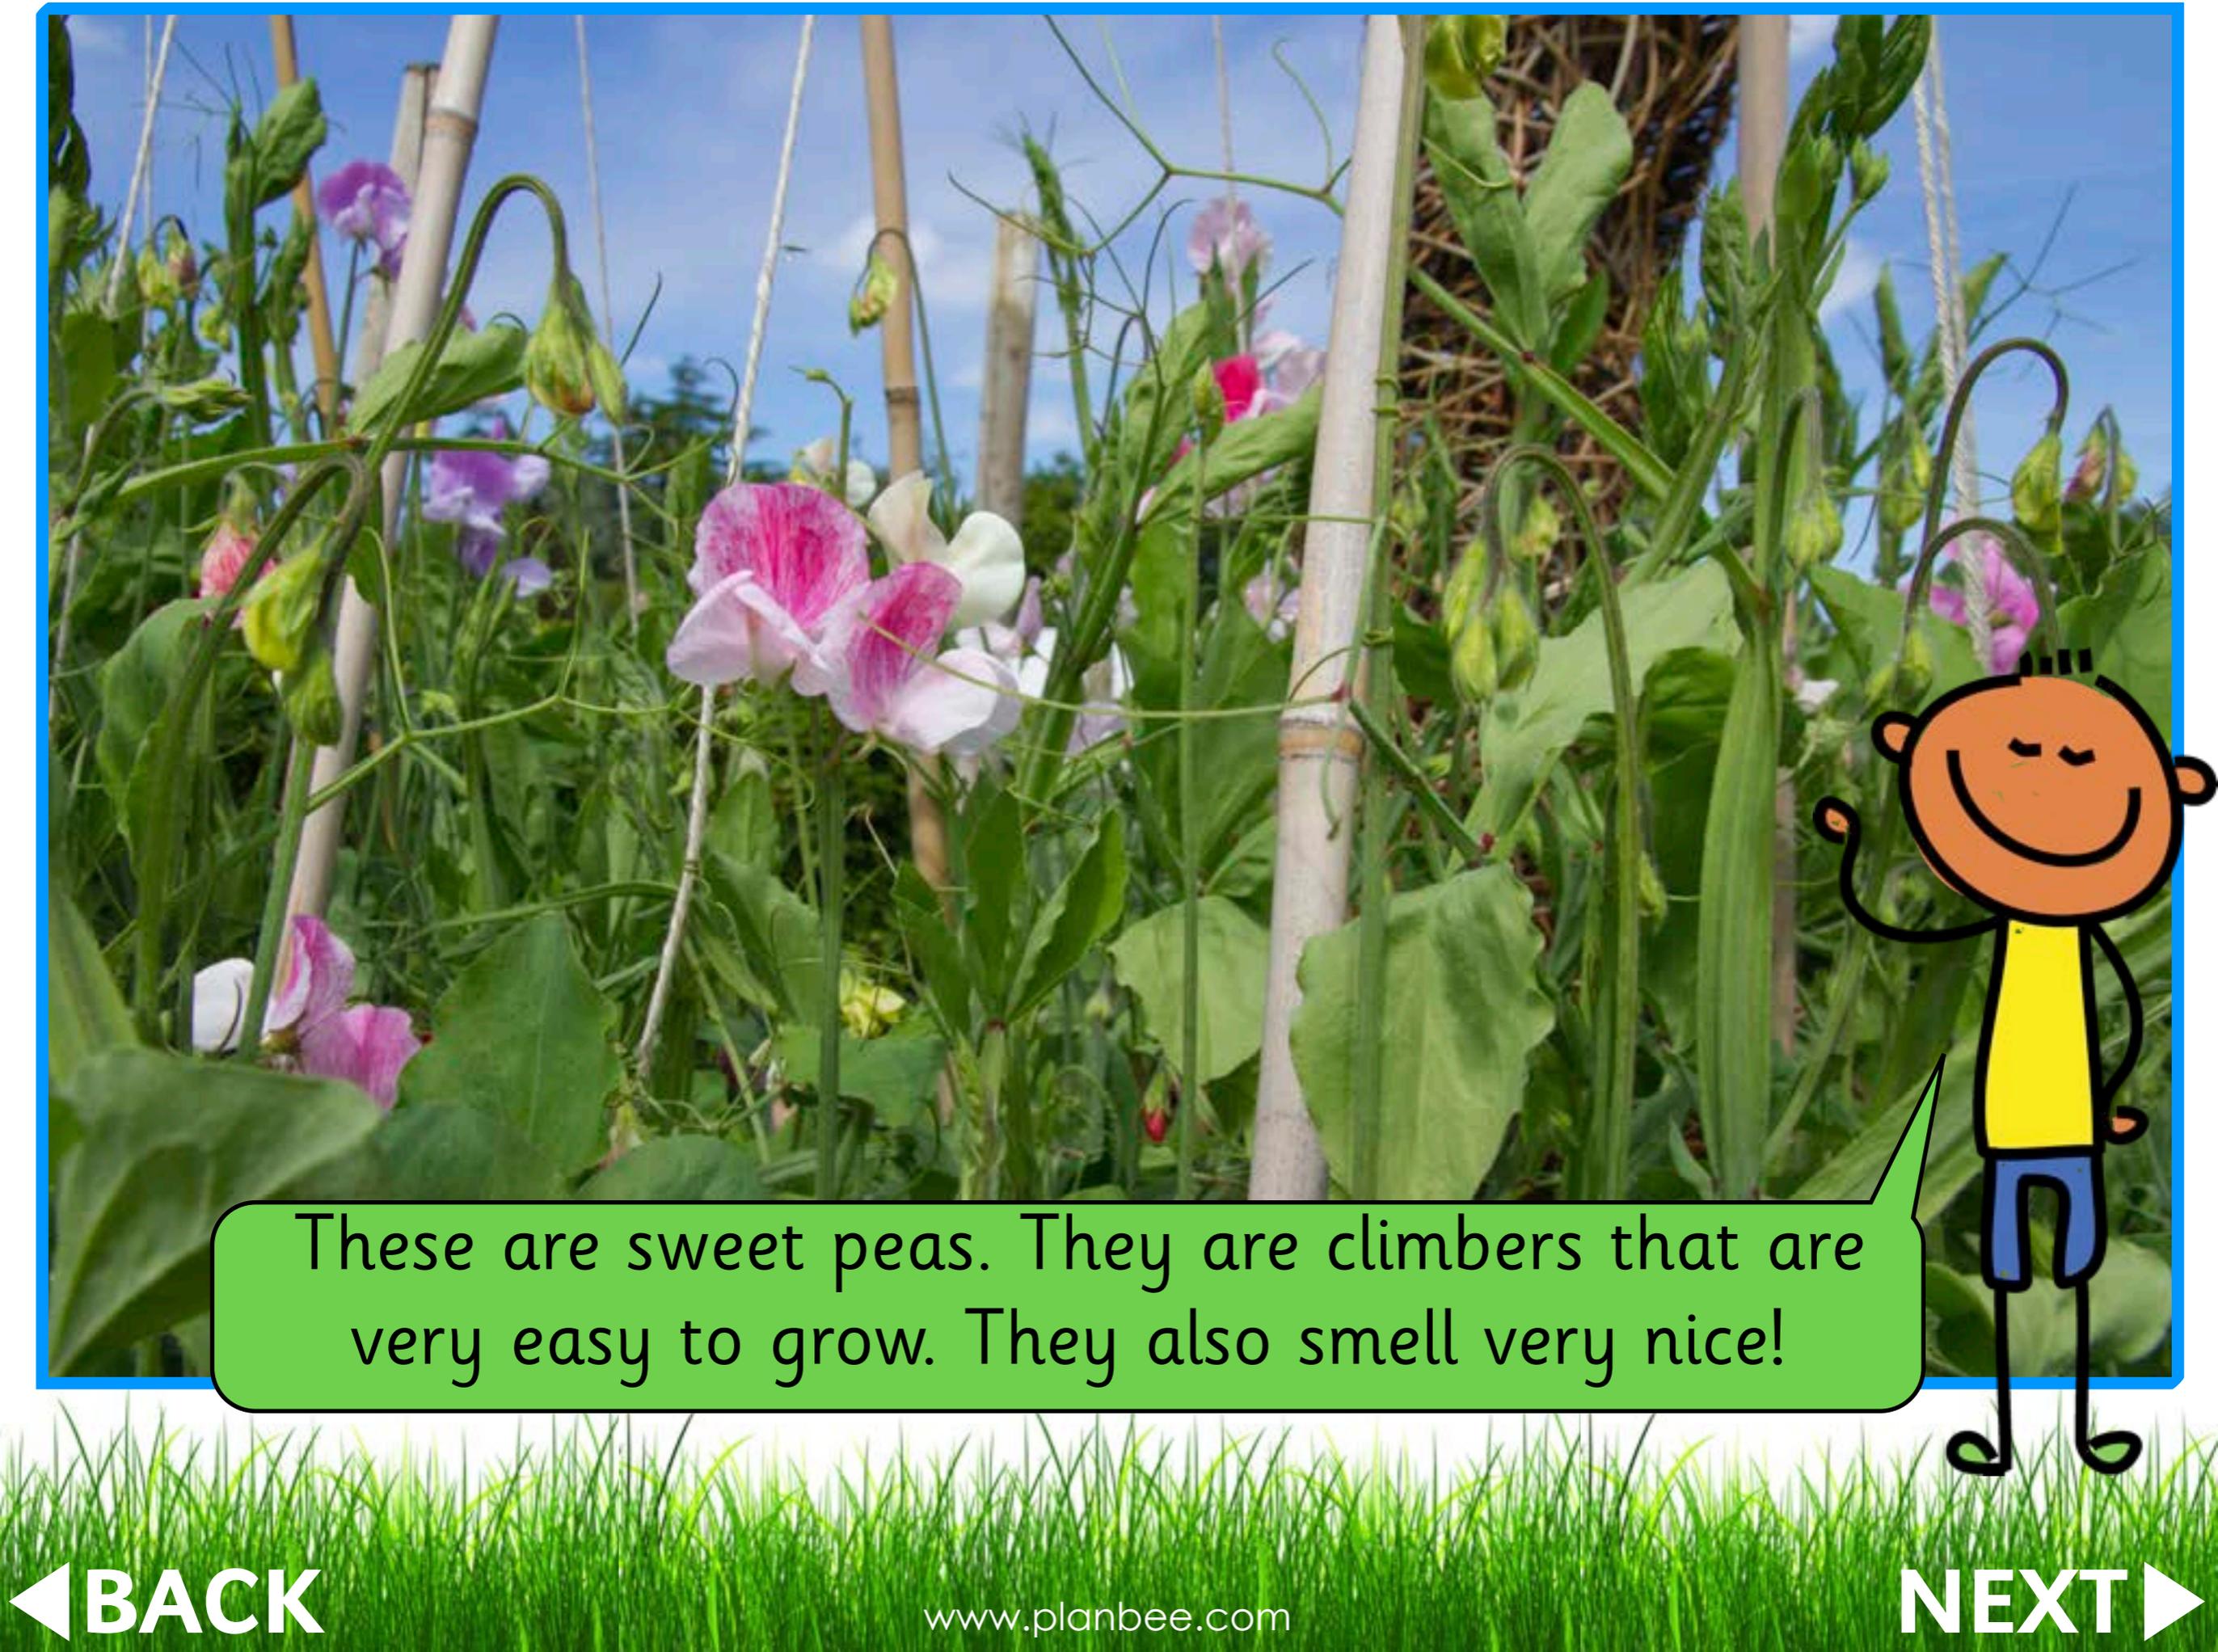

They are all growing in gardens.  
Can you name any of the plants?

These are primula. They are small plants that are easy to grow.

These are sweet peas. They are climbers that are very easy to grow. They also smell very nice!

This picture has a lot of plants in it. The yellow flowers are daffodils, the red flowers are tulips and the blue flowers are forget-me-nots.

This picture also has a lot of plants in it. Most of the flowering plants are roses. Did you spot the trees? They are plants too!

This is an apple tree in an orchard. Why do you think someone with a big garden might have an apple tree?

This is a weeping willow. It is unusual because of its drooping shape. Can you describe this tree?

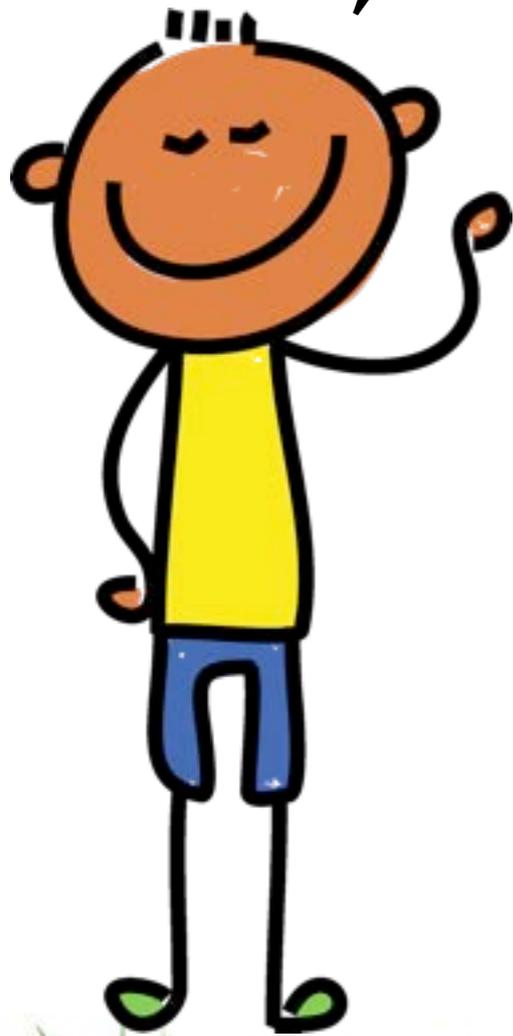

Different people like to have different plants growing in their gardens.

Some people like plants that are easy to grow. Like the primula and the sweet pea.

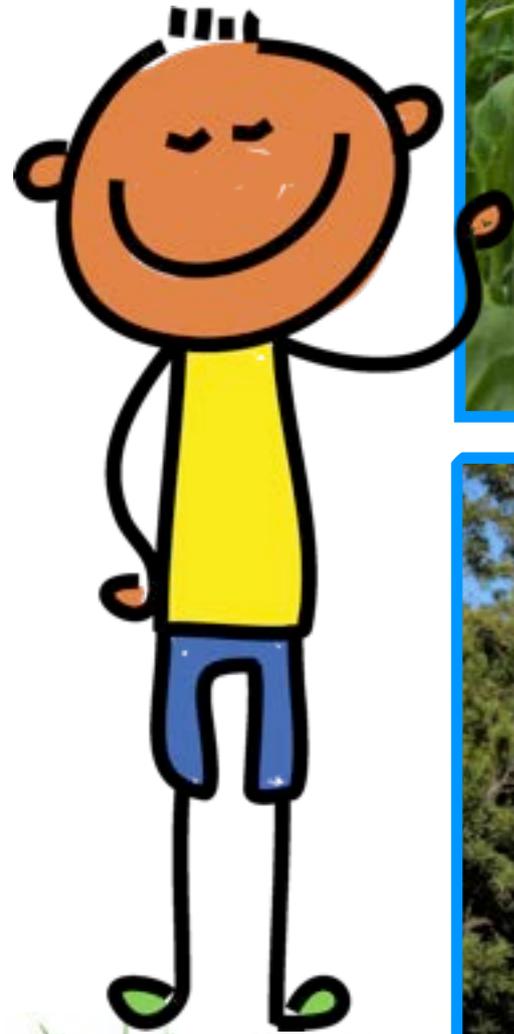

Other people choose flowers for their colour or because they attract insects.

If you will be identifying plants click me!

If you will be designing a garden click me!

Can you name all these plants?  
Click me when you are ready to go to the plenary.

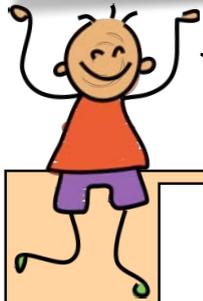

You are going to be designing your garden on a sheet like this.

Identifying Plants

Worksheet 2D

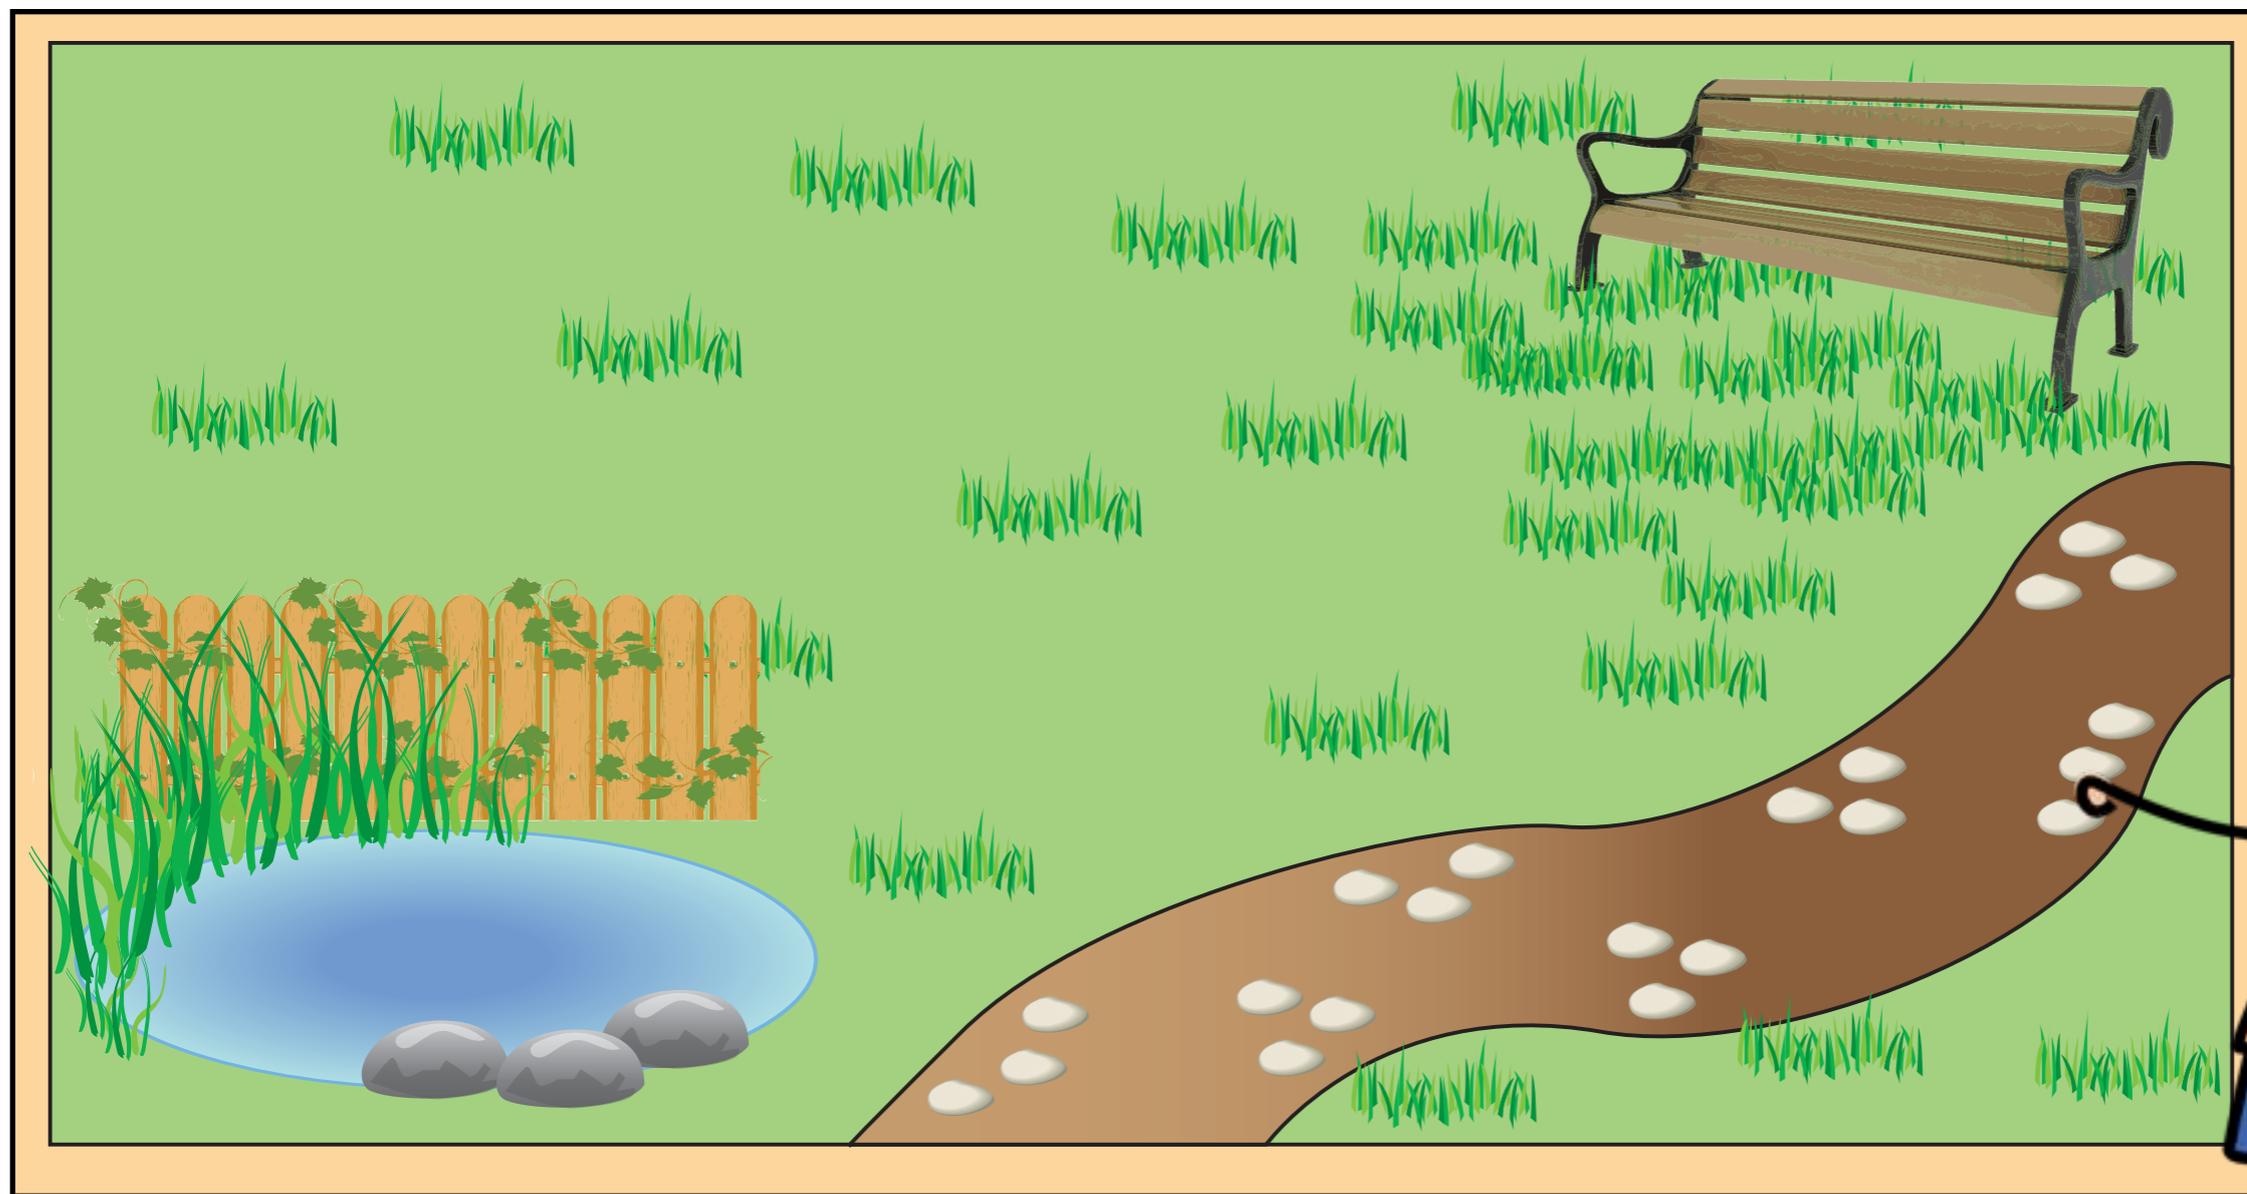

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Design your garden here! Don't forget to label your plants so we know what everything is.

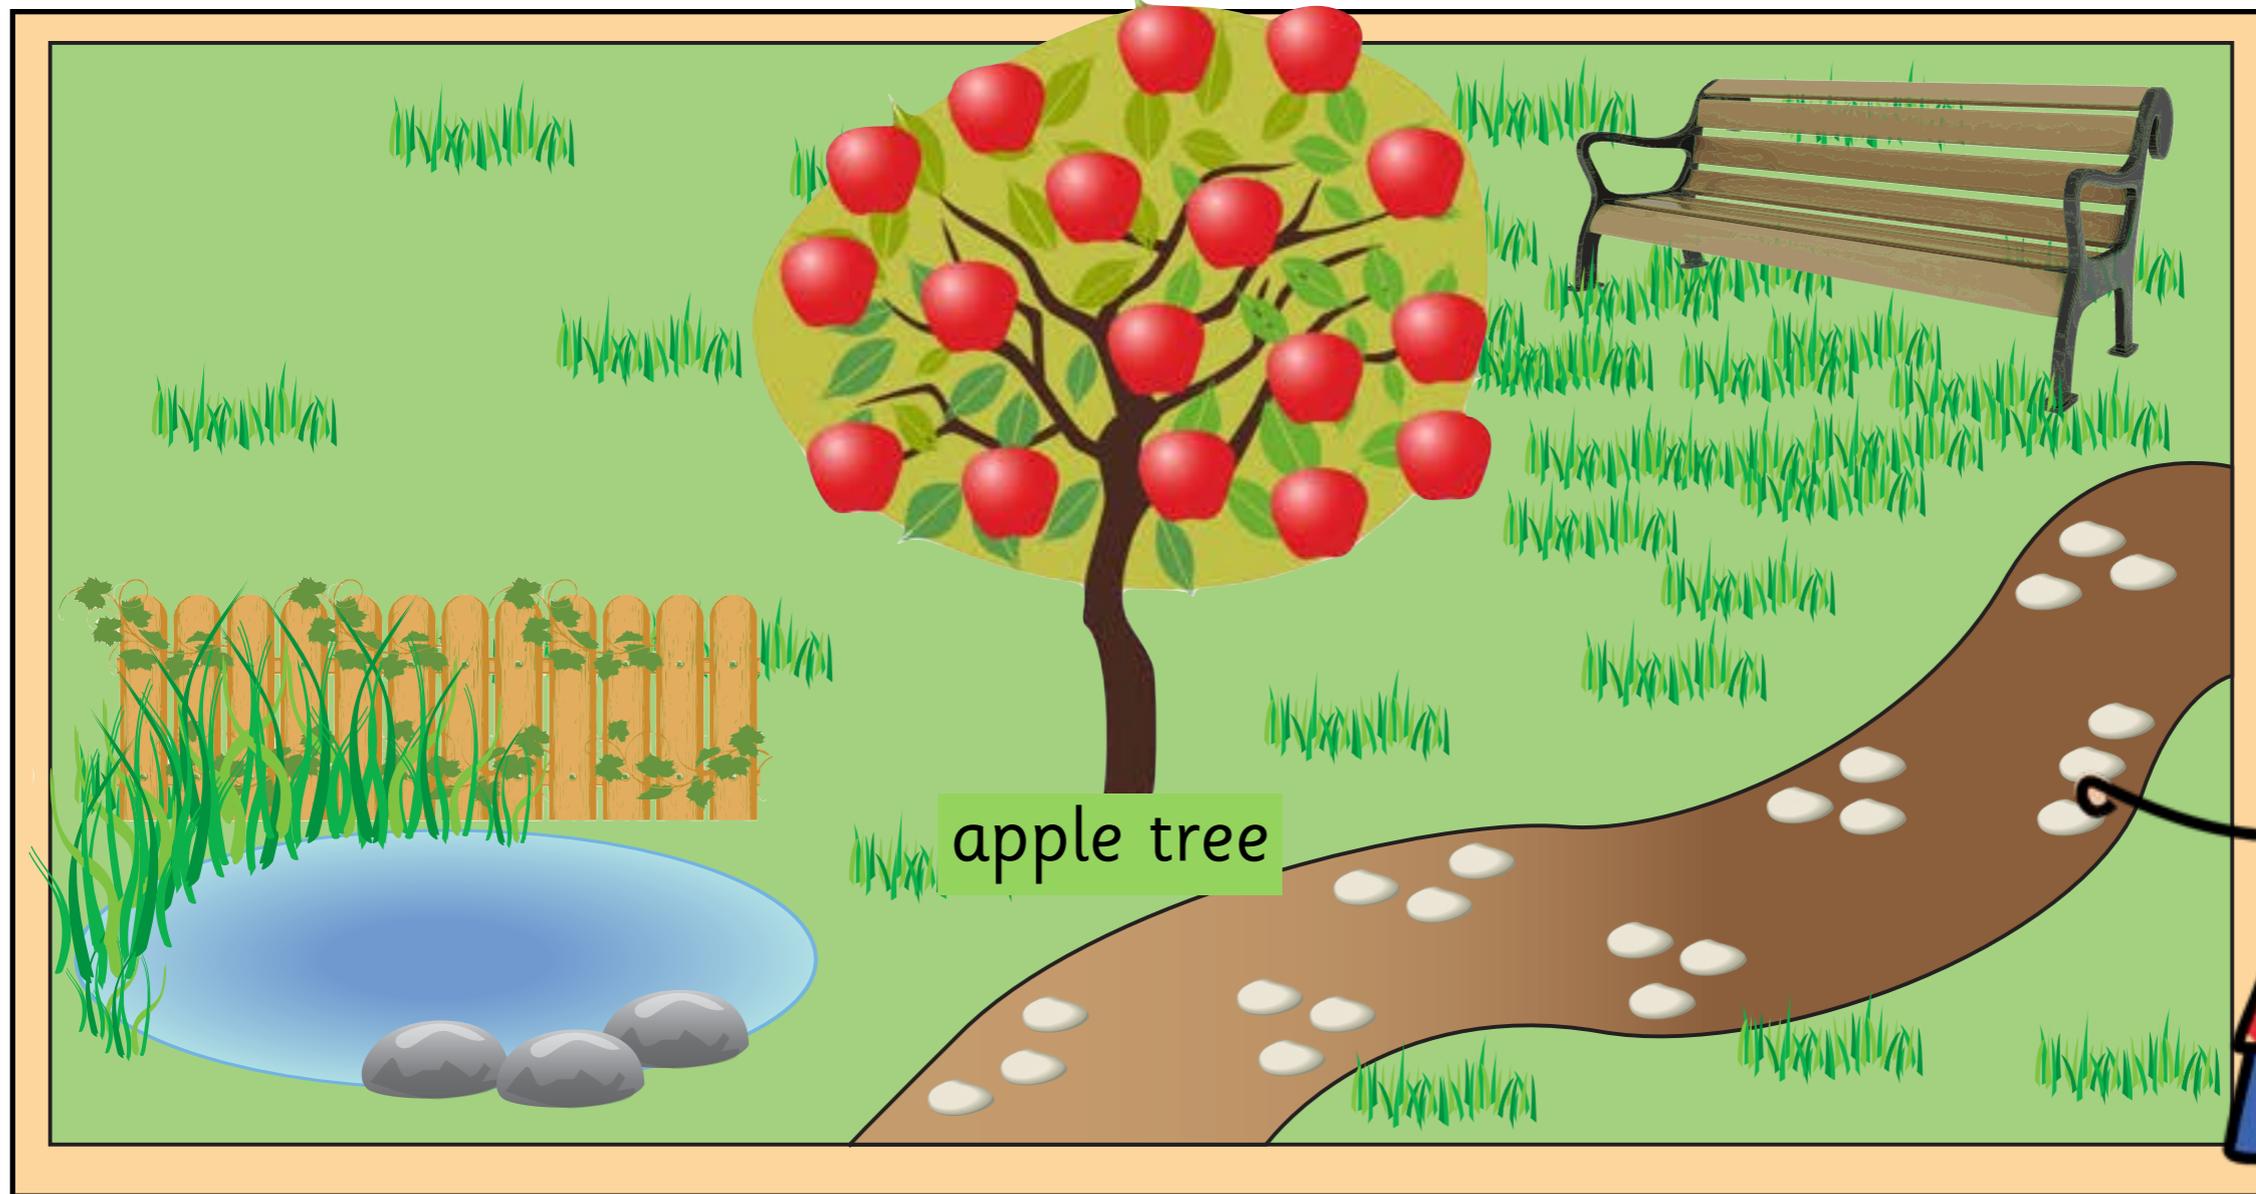

Can you explain why your garden design should be used?

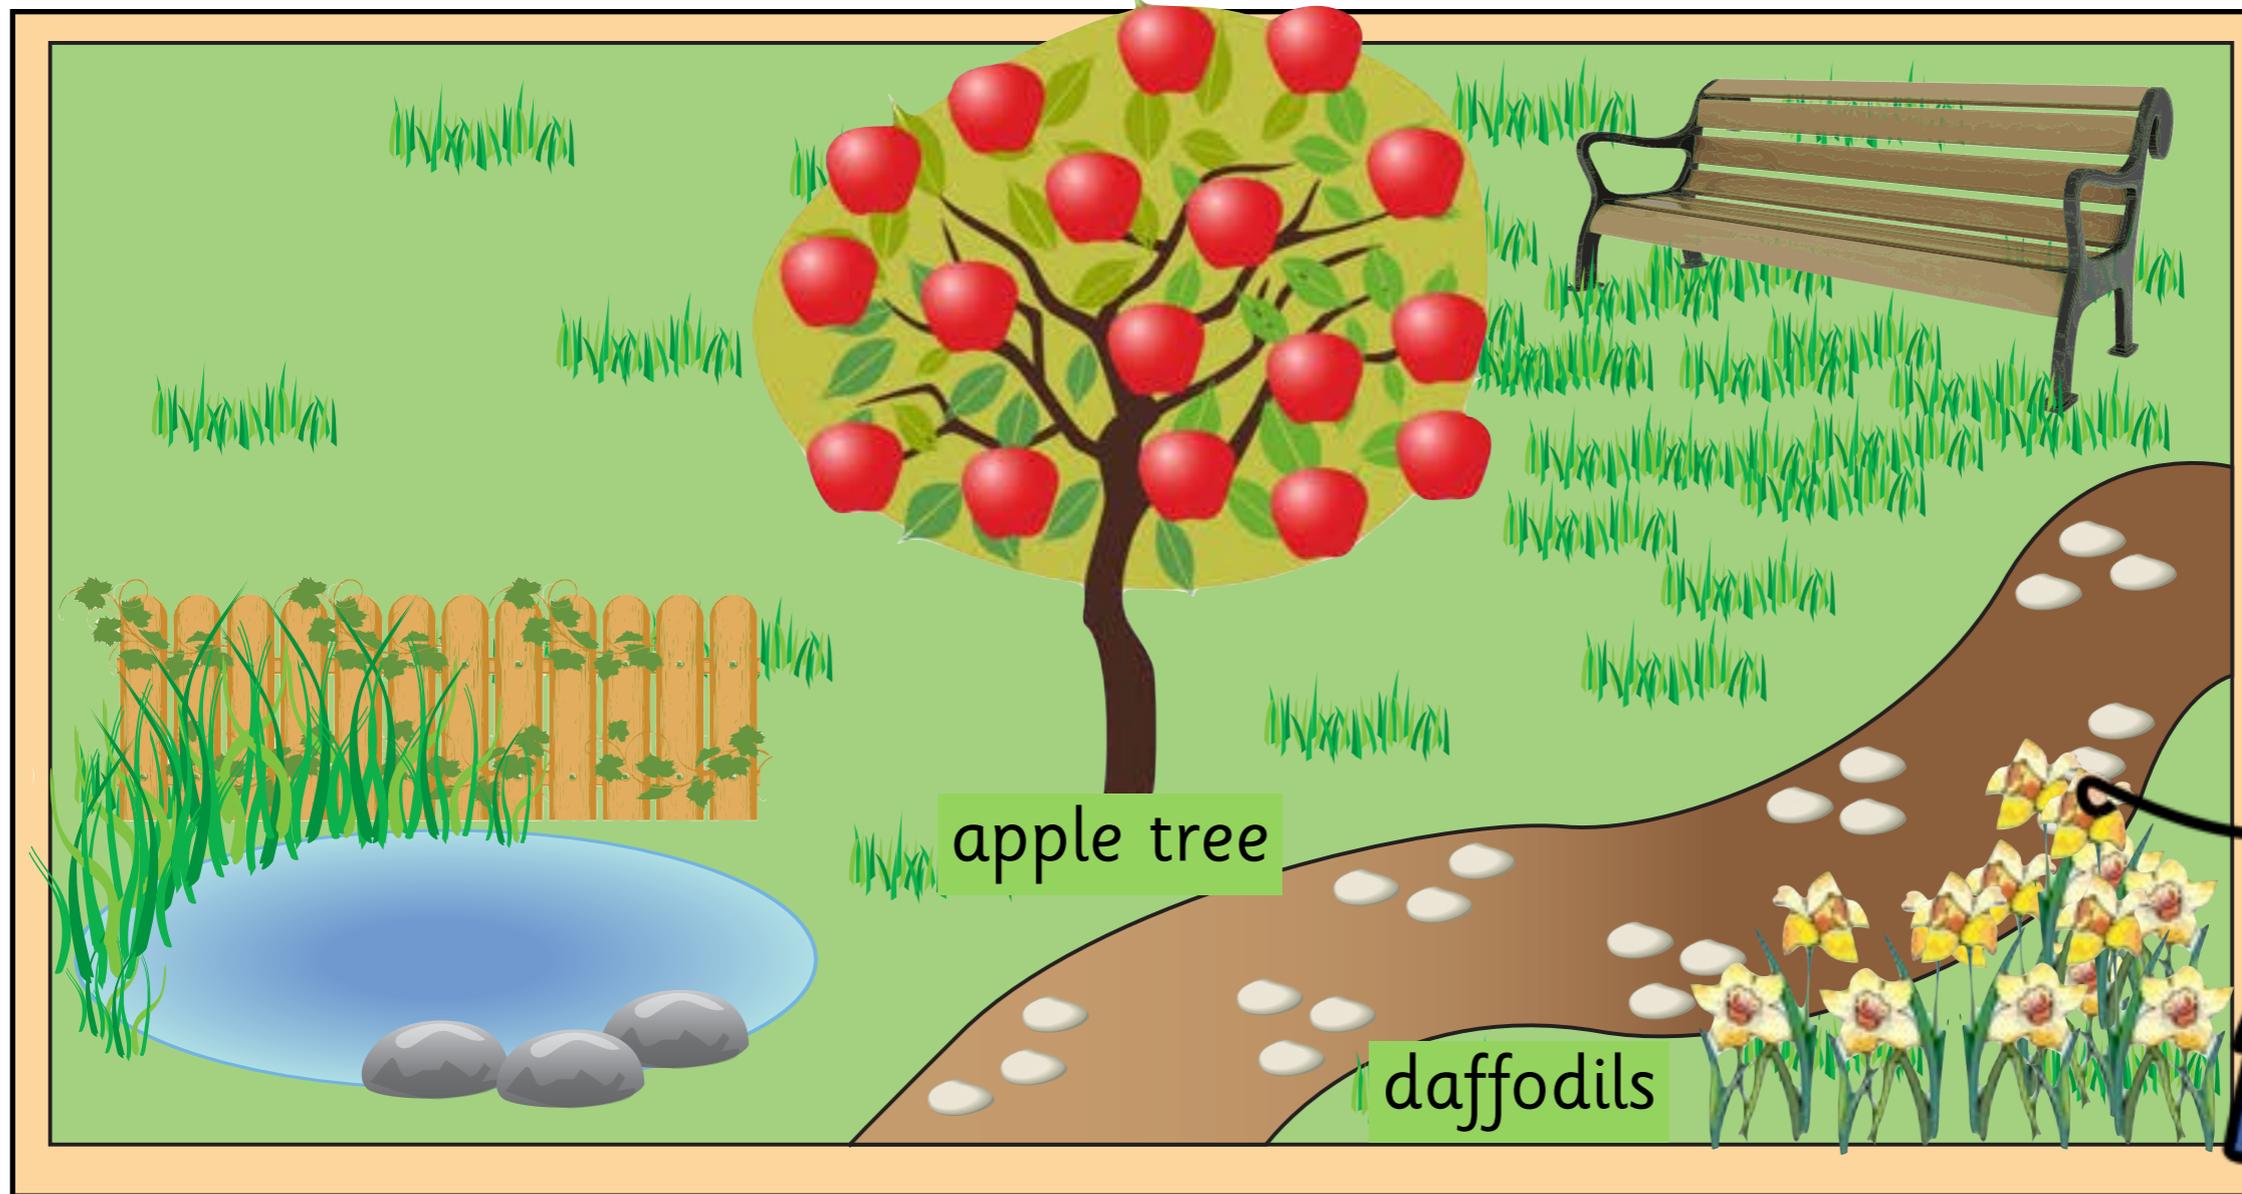

Before you can start you need to draw your path, then decide which plants you would like. I am going to start with an apple tree.

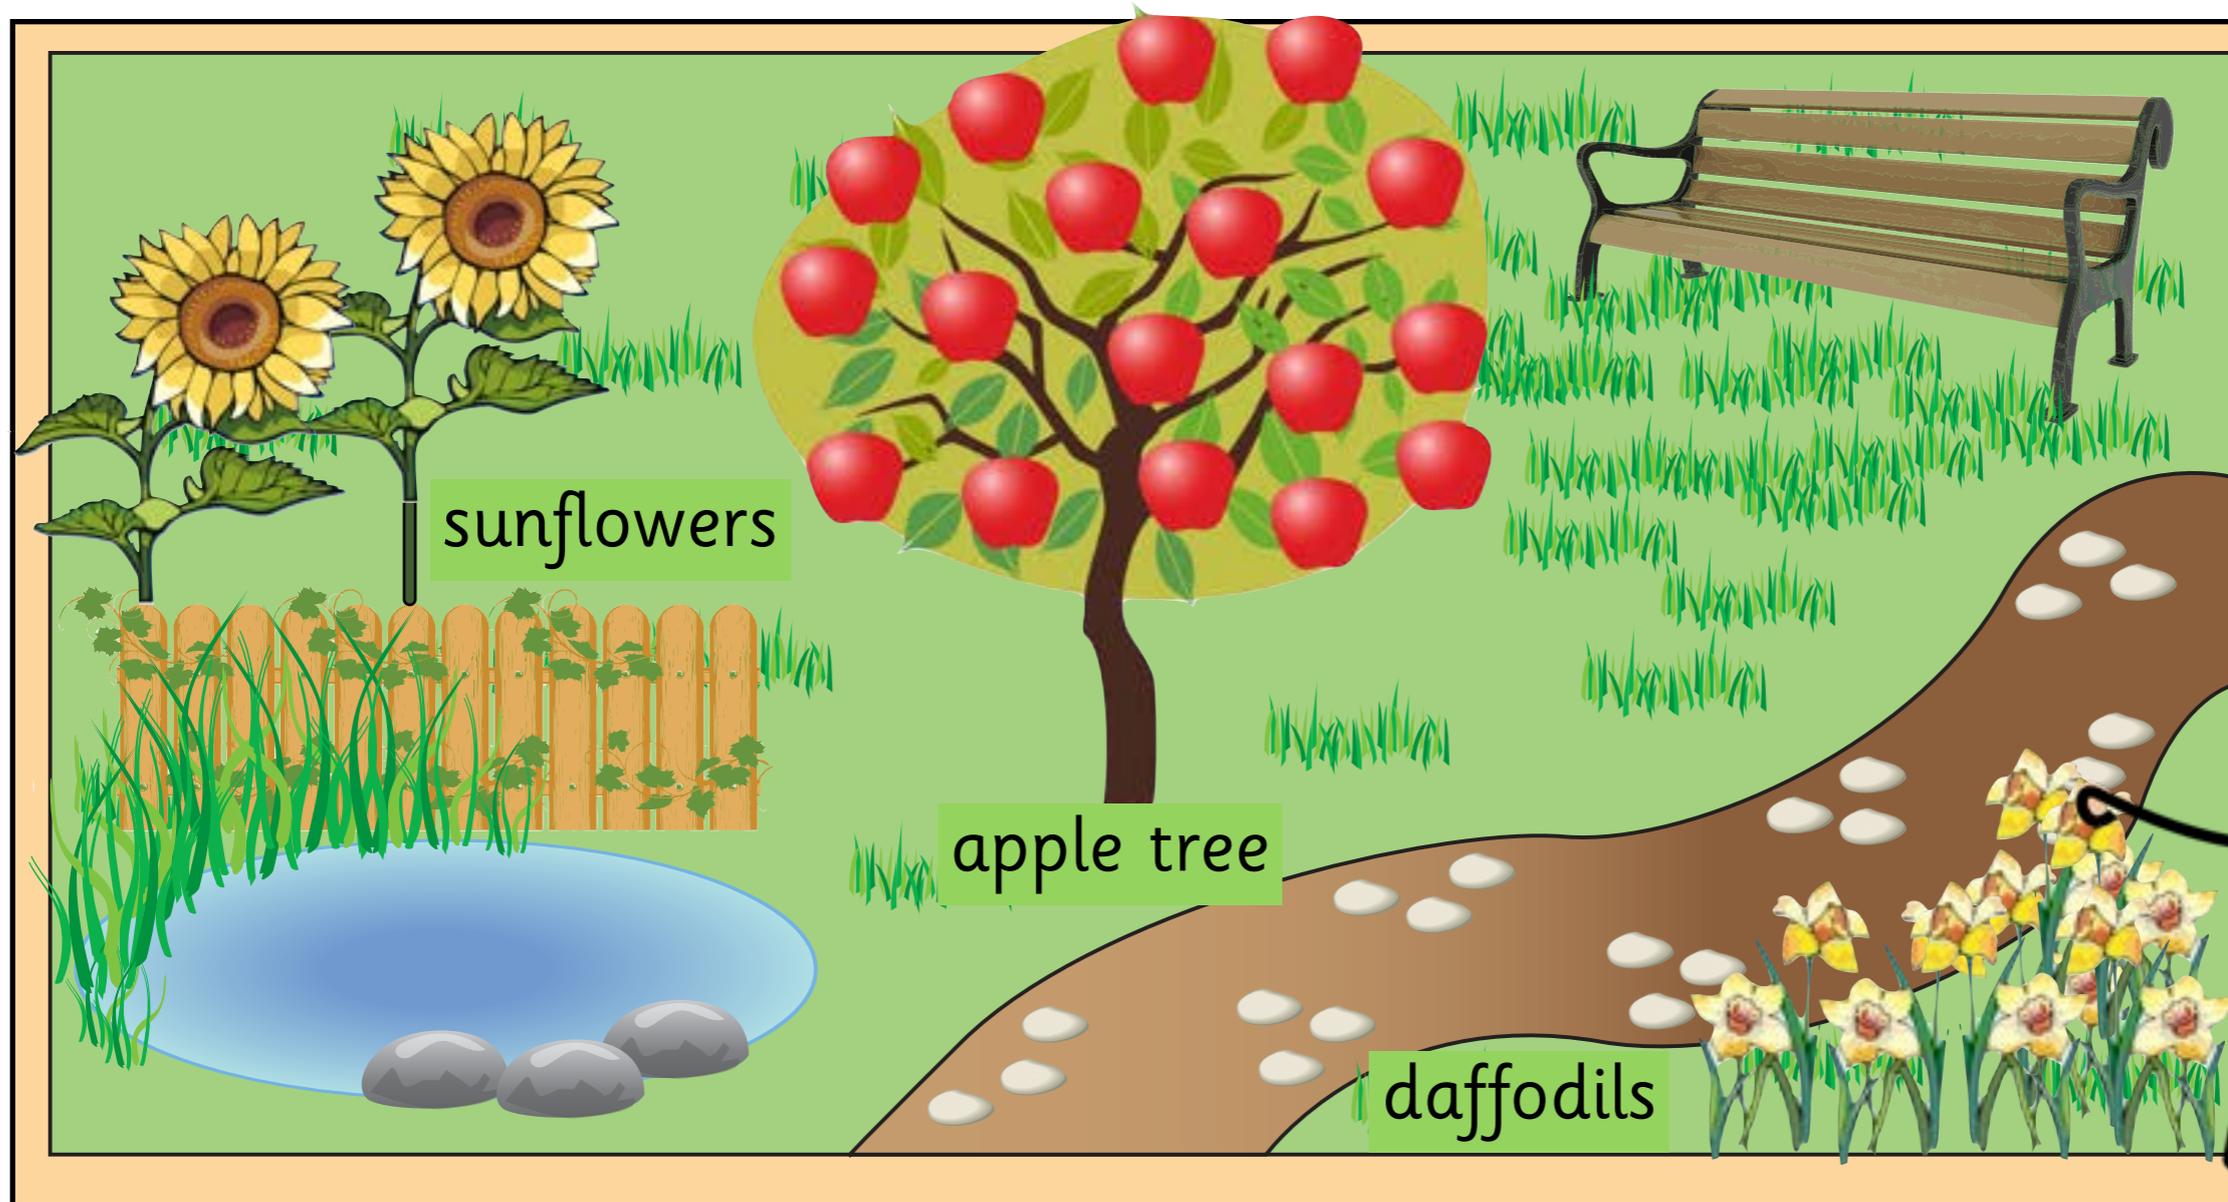

First I draw it on my plan. Remember apple trees are big, so they will need a lot of space. When I have drawn it I need to write a label so I remember what it is.

Next I am going to draw some daffodils on my plan.  
Remember they will be much smaller than the apple tree!  
Then I write a label so I remember what they are.

Next I am going to draw some sunflowers on my plan. They will be smaller than the apple tree, but bigger than the daffodils!

Can you guess what it is?

It is a  
**SUNFLOWER!**

Can you guess what it is?
